

## Fake news

I believe that to stop fake news is possible we just need to take some time, but we might need to change some rules about how to write news. In this essay I will discuss whether it is possible to stop the spread of fake news. For instance, I will write about why we need to stop fake news, and how to stop fake news. Why its near impossible to stop fake news, and what can be hard about stopping fake news.

First of all, I believe that stopping fake news is possible, for different reason for instance we just need to change some rules about how to write a news article, for example give out five trust wordy sources that can confirm what you are publishing is correct. We can also make the article to give out other news articles who has written about the same thing. I think we need to stop the fake news, so people don't believe in lies, or make ruckus about things that is a lie. This can be seen in the united states of America where people believe in the fake news and it shown in the videos about all the problems that is currently happening. We can see this in ([\*nrk.no,2020\*](#)) and that's why we need to the spread of fake news. That's why I believe that with no fake news the world will became calmer. In short, I believe the fake news can be stopped if we just change the rules on how to write a news article.

Secondly, I believe everyone needs to help stopping fake news, and we can do this thanks to the five tips made from (BBC.com, December 2018). Do not react to the news article, search up if it is true or not, and if it is fake just leave the site and don't do anything with the article you should also cheek for any spelling mistakes or if you get very emotional to the text read it again to be on the safe side. My own tips would don't trust everything on social media since that's the easiest place to spread fake news, and cheek if some other news article you trust talk about the same thing. And this is how you can stop and help fake news with these tips.

I would say it is near impossible to stop fake news. I say this because it's so easy to trick people in to believing in something fake. This is thanks to social media and how you can photoshop images and videos, and soon it will be impossible to tell the differences between images is real or fake. It can also be hard to remove fake news because people tend to believe inn a person as long as they have a degree in what topic they are talking about. That why I am saying it is near impossible to stop fake news, because the technology has grown so advanced that it is easy to fake news.

In conclusion I believe it is possible to stop fake news, but it is just really difficult to get rid of the fake news. As long as we change some rules. And we can help each other with the tips on how to stop the fake news. And that's why I believe the fake news will be gone and whatever ruckus is happening thanks to the fake news will die out, but it will be a challenge.
